

ADVANCED METERS
SERVE YOU BETTER

Advanced meters improve **efficiency** and **reliability** for our members.

UNITED POWER
Your Touchstone Energy® Cooperative

Looking Out For You

Member Benefits of Advanced Meters

United Power uses the Elster EnergyAxis two-way advanced meter to safely and securely transmit meter readings and power reliability information. The advanced meters help United Power operate more efficiently and provide more reliable service to our members.

The meters also offer numerous benefits that directly benefit our members. The metering technology allows members to take advantage of several programs to help them better manage their energy, and give them more choice and flexibililty in managing their electric account.

LEARN MORE ABOUT WHAT YOUR ADVANCED METER CAN DO FOR YOU

ACCOUNT MANAGEMENT

- **Choose your Billing Period**
  Efficient meter reading allows members to choose a billing timeframe for a time of the month that is most convenient for them.
- **Pay As You Go**
  With daily metering information, members can enroll in a pre-paid electricity program to help them manage their energy budget, and avoid deposits and late fees.
- **Usage Explorer**
  The Usage Explorer is a free online tool for members that provides insight into energy use and consumption history. Usage information is located inside the same portal where members view and pay bills so members can manage their energy use—before their monthly bill arrives.

RELIABILITY

- Advanced meters help us locate—and respond to—outages faster and more safely.
- Advanced meters can help us improve power quality, reducing surges and blinking.

AFFORDABILITY

- Operating more efficiently can help minimize cost increases.
- We can use the data to help our members address high bills.

EFFICIENCY

- With remote meter reading and reconnection, we can save time and money (and reduce air pollution).
- With more detailed data about demand and usage, we can distribute power more efficiently.
