UNITED POWER, INC. Tariff Schedule R1

500 Cooperative Way
Brighton, CO 80603

ELECTRIC RATES

RESIDENTIAL SERVICE
(Schedule R1) **Rate**

Availability
Available within all territory served by United Power.

Applicability
Applicable for residential services where the total load does not exceed one hundred (100) kilowatts for all residential uses.

Type of Service Available
Single-phase and three-phase, 60 cycles, at available secondary voltages.

Monthly Rate

Fixed Charge:	$22.00
Energy Charge: All kilowatt hours used, per kWh	$~~0.1184~~0.1215
Demand Charge: All kilowatts of billing demand, per kW	~~$4.55~~$5.10

Determination of Billing Demand
Except as otherwise provided by the Service Rules and Regulations, the billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen (15) minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and corrected for power factor as applicable.

Power Factor Adjustment
The member shall maintain unity power factor as nearly as practicable. The measured demand may be increased to obtain billing demand, if and when United Power deems necessary, by increasing the measured demand by 1% for each 1% by which the power factor is less than 95% lagging.

Monthly Minimum
The monthly minimum shall be the Fixed Charge.

Rate Adjustment
This rate schedule is subject to the Rate Adjustment set forth ~~on Sheet 7.1~~ in Tariff Schedule PCA.

Meter Readings
Meter Reading shall be performed by United Power.

Terms of Payment
Bills for electric service are due and payable by the due date indicated on the bill.

Termination Notice
Termination of this service requires three (3) days' notice.

Rules and Regulations
Electric service supplied under this schedule shall be subject to the terms and conditions set forth in the most current United Power's policies, tariffs, and other rules and regulations set forth in The Standard for Electric Installation and Use.

Issue Date: ~~Oct. 28~~Nov. ~~xx~~4, 202~~5~~6

ELECTRIC RATES

LARGE COMMERCIAL COINCIDENTAL PEAK SECONDARY DEMAND SERVICE (Schedule CPS1)	**Rate**
Availability Available within all territory served by United Power, and to any member-consumer with a minimum controllable demand of 50 kW.	
Applicability Applicable for all commercial and industrial use.	
Type of Service Available Three-phase, 60 cycles, at available secondary distribution voltages; available only where the total load exceeds one hundred (100) kW. ~~not available where the total load does not exceed one hundred (100) kW.~~	
Monthly Rate	
Fixed Charge:	$200.00
Demand Charge:	
Grid Access Demand ($/kW-NCP)	$8.14
Generation & Transmission Demand ($/kW-CP)	$~~25.67~~27.73
Energy Charge:	
All kilowatt hours used, per kWh	$0.~~0856~~0846
Rate Adjustment This rate schedule is subject to the Rate Adjustment set forth in Tariff Schedule PCA~~on Sheet 7.1.~~	
Non-Coincidental Peak (NCP)--Determination of Non-Coincidental Billing Demand Except as otherwise provided by the Service Rules and Regulations, the billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen (15) minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and corrected for power factor as applicable.	
Coincidental Peak (CP)--Determination of Coincidental Billing Demand The member's highest fifteen (15) minute integrated total kW demand in each billing period during the coincidental peak (CP) periods and as determined to be in United's Control Period day. The coincidental periods in any billing period shall consist of a six (6) hour period each day, Monday through Saturday, with the exception of Sundays and the following six (6) holidays if occurring on a Monday through Saturday: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.	

The Control Period shall be defined as the period of time during which United is controlling these loads during the coincidental period with the intent of minimizing demand on the distribution system.

The six (6) hour coincidental peak period each day for the months of June through September shall be for the time period starting at 2:00 p.m. and ending at 8:00 p.m. The six (6) hour coincidental peak period each day for the months of January through May and October through December shall be for the time period starting at 4:00 p.m. and ending at 10:00 p.m. For any such day that includes a six (6) hour coincidental peak period, United Power may, at its discretion notice the member by any means possible to define the Control Period day.

If a reduction in the number of coincidental peak hours is made for any such day, the member's highest fifteen (15) minute integrated total kW demand used to calculate the Generation and Transmission Demand charges shall be determined only from the hours in such billing period that have been designated by United Power to be coincidental peak periods.

Power Factor Adjustment

The member shall maintain unity power factor as nearly as practicable. The measured demand may be increased to obtain billing demand, if and when United Power deems necessary, by increasing the measured demand by 1% for each 1% the power factor is less than 95% lagging.

Monthly Minimum

The monthly minimum shall be the Fixed Charge.

Grid Access Demand ($/kW-NCP)	$ -
Energy Charge:	
All kilowatt hours used, per kWh	$ 0.0576
Minimum Monthly Charge	$ 4,000.00
ITD2. Service received at 230/115 kV transmission service to low side of bus at 69/34.5/25/13.2/12.47 kV	
Fixed Charge:	$ ~~3,300.00~~3,500.00
Demand Charge:	
Generation Demand ($/kW-CP)	$ ~~19.78~~20.18
Transmission Demand ($/kW-CP)	$ ~~5.29~~6.45
Grid Access Demand ($/kW-NCP)	$ ~~2.24~~1.27
Energy Charge:	
All kilowatt hours used, per kWh	$ 0.~~0571~~ 0562
Minimum Monthly Charge	$12,000.00

ITD3. Service received at 69/25/34.5 kV transmission service	
Fixed Charge:	$~~3,300.00~~3,500.00
Demand Charge	
Generation Demand ($/kW-CP)	$~~20.13~~21.01
Transmission Demand ($/kW-CP)	$~~5.38~~6.76
Grid Access Demand ($/kW-NCP)	$~~5.88~~4.58
Energy Charge:	
All kilowatt hours used, per kWh	$0.~~0580~~0569
Minimum Monthly Charge	$16,000.00
ITD4. Service received at 69/34.5 kV sub-transmission service to low side of the bus at 13.2/12.47 kV	
Fixed Charge:	$~~3,300.00~~3,500.00
Demand Charge:	
Generation Demand ($/kW-CP)	$20.~~24~~44
Transmission Demand ($/kW-CP)	$5.~~40~~45
Grid Access Demand ($/kW-NCP)	$6.~~72~~78
Energy Charge:	$.0576
All kilowatt hours used, per kWh	
Minimum Monthly Charge	$22,000.00

Coincidental Peak (CP)--Determination of Coincidental Billing Demand

The member's highest ~~thirty~~ fifteen (~~30~~15) minute integrated total kW demand in each billing period during the coincidental peak (CP) periods.

The coincidental periods in any billing period shall consist of a six (6) hour period each day, Monday through Saturday, with the exception of Sundays and the following six (6) holidays if occurring on a Monday through Saturday: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

The six (6) hour coincidental peak period each day for the months of June through September shall be for the time period starting at 2:00 p.m. and ending at 8:00 p.m. The six (6) hour coincidental peak period each day for the months of January through May and October through December shall be for the time period starting at 4:00 p.m. and ending at 10:00 p.m.

The member's highest ~~thirty~~ fifteen (~~30~~15) minute integrated total kW demand used to calculate the Generation and Transmission Demand charges shall be determined only from the hours in such billing period that have been designated by United Power to be coincidental peak periods.

Non-Coincidental Peak (NCP)--Determination of Non-Coincidental Billing Demand
Except as otherwise provided by the Service Rules and Regulations, the billing demand shall be the maximum kilowatt demand established by the member for any period of ~~thirty~~ fifteen (~~30~~15) minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and corrected for power factor as applicable.

Power Factor Adjustment
The member shall maintain unity power factor as nearly as practicable. The measured demand may be increased to obtain billing demand, if and when United Power deems necessary, by increasing the measured demand by 1% for each 1% the power factor is less than 95% lagging.

Monthly Minimum
The monthly minimum charge shall be as listed under each rate option.

Meter Readings
Meter readings for service shall be made by United Power.

Terms of Payment
Bills for electric service are due and payable by the due date indicated on the bill.

Termination Notice
Termination of this service requires three (3) days' notice.

Rules and Regulations
Electric service supplied under this schedule shall be subject to the terms and conditions set forth in the most current United Power's policies, tariffs, and other rules and regulations set forth in The Standard for Electric Installation and Use.

ELECTRIC RATES

RATE ADJUSTMENT FOR RETAIL SERVICE
(Schedule PCA) **Rate**

Availability

The rates in all Cooperative rate schedules subject to the Rate Adjustment set forth on this ~~Sheet 7.1~~Tariff Schedule PCA, shall be subject to adjustment by the Wholesale Power Cost Adjustment as set forth below.

Wholesale Power Cost Adjustment

Billings to customers will be increased or decreased to reflect the amount by which actual cost of power, expressed in $/MWh, exceeds or is less than the budgeted cost of power in $/MWh for any given calendar quarter. The variance will be calculated within 30 days following the end of each calendar quarter and will be collected from or returned to customers over the following three-month period. ~~the total cost of purchased power per kilowatt-hour sold for the Cooperative exceeds or is less than the base cost from the previous yearbudgeted amount in any given calendar quarter. Calculations of deviations shall occur within 30 days of the end of a calendar quarter and distributed or collected during the following three-month time frame.~~ The determination of the amount shall include a deadband set forth by the Board of Directors. The deviation deadband is currently set at +/- 2% before an adjustment under this tariff is applied and has a maximum adjustment of +/-7%.

Monthly Rate

Wholesale Power Cost Adjustment is per kWh adjust based upon the calculations detailed above.

ELECTRIC RATES

NON-METERED LIGHTING SERVICE (Schedule L2)	**Rate**

Availability

Available within all territory served by United Power.

Applicability

Non-Metered Lighting Service is for the electric energy and lighting equipment to be used by the member-consumers for the purpose of lighting property, streets, avenues, boulevards, parks, alleys, and public places.

Type of Service

United Power-owned high pressure sodium, mercury vapor lamps, metal halide, and LED burning dusk to dawn, where service is available from United Power's existing secondary voltage distribution facilities.

Monthly Rate

Monthly Charge per fixture for lighting units:

SINGLEHEAD

Watts	Type	Rate
50 / 70	High Pressure Sodium/Metal Halide	$ 12.~~24~~ 30
100	High Pressure Sodium	$ 13.~~33~~ 39
150	High Pressure Sodium/Metal Halide	$ 16.~~08~~ 16
175	Mercury Vapor	$ 16.~~51~~ 59
250	High Pressure Sodium/Metal Halide	$ 20.~~73~~ 83
400	High Pressure Sodium/Metal Halide	$ 27.~~81~~ 95

DOUBLEHEAD

Watts	Type	Rate
50 / 70	DOUBLEHEAD High Pressure Sodium/Metal Halide	$ 24.~~48~~ 61
150	DOUBLEHEAD High Pressure Sodium/Metal Halide	$ 31.~~53~~ 69
250	DOUBLEHEAD High Pressure Sodium/Metal Halide	$ ~~40.80~~41.01
400	DOUBLEHEAD High Pressure Sodium/Metal Halide	$ 55.~~62~~ 90

LED SINGLEHEAD

Watts	Type	Rate
70	LED	$ 10.9~~72~~
100/110	LED	$ 10.9~~72~~
150	LED	$ 10.9~~72~~

LED SINGLEHEAD

Watts	Type	
250	LED	$ 13.781
400	LED	$ 13.781

LED DOUBLEHEAD

Watts	Type	
50/70/100/150W	DOUBLEHEAD LED	$ 22.0415
250	DOUBLEHEAD LED	$ 27.4357
400	DOUBLEHEAD LED	$ 27.4357

Terms of Payment

Bills for electric service are due and payable by the due date indicated on the bill.

Termination Notice

Termination of this service requires three (3) days' notice.

Maintenance

United Power will maintain in good operating condition all Standard Lighting equipment used to provide service hereunder.

Rules and Regulations

Effective June 19, 1981, no additional mercury vapor lighting systems or mixed ownership systems shall be installed by United Power. However, service under this schedule shall continue to be available to existing, mercury vapor units until further notice.

United Power will operate and maintain all Standard lighting equipment in accordance with the terms and conditions set forth in the most current United Power's policies, tariffs, and other rules and regulations set forth in The Standard for Electric Installation and Use.

UNITED POWER, INC. **Tariff Schedule SL**

500 Cooperative Way
Brighton, CO 80603

ELECTRIC RATES

SHARED LIGHTING SERVICE
(Schedule SL)

Availability
Available within all territory served by United Power.

Applicability
Shared Lighting Service is for the electric energy and lighting equipment to be used by the member-consumer for the purpose of lighting property, streets, avenues, boulevards, parks, alleys, and public places in unincorporated areas in which there is no organization possessed of power to contract for such service or grand-fathered areas.

Type of Service
United Power-owned high pressure sodium and mercury vapor lamps, not to exceed 150 watts, burning dusk to dawn, where service is available from United's existing secondary voltage distribution facilities.

Monthly Rate
Monthly Charge per member per month

Watts	**Type**	
50 /70/100/150	High Pressure Sodium and LED	$3.~~86~~88

Terms of Payment
Bills for electric service are due and payable by the due date indicated on the bill.

Termination Notice
Termination of this service requires three (3) days' notice.

Maintenance
United will maintain in good operating condition all Standard Lighting equipment used to provide service hereunder.

Rules and Regulations
Electric service supplied under this schedule shall be subject to the terms and conditions set forth in the most current United Power's policies, tariffs, and other rules and regulations set forth in The Standard for Electric Installation and Use, and to the terms and conditions of any special contract for service between United and the member not in conflict herewith and the following special conditions:

1. Shared Lighting Service will be provided only in such areas where the population density justifies service and in which there must be located sufficient electric

customers of the Company to justify the installation of a minimum of five street lights in a manner so as to render adequate street lighting for the area on the basis of an average of not less than seven members per street light.

2. Shared Lighting Service provided shall be furnished in accordance to the Company's Line Extension Policy as part of the residential electric service or commercial electric service to members in the particular unincorporated area or subdivision receiving such service. The Company shall maintain records which delineate the boundaries within which said service is provided. Those members located within the boundaries of the areas shall be billed for said Shared Lighting Service.

3. Shared Lighting Service will be installed and supplied by the Company in accordance to the Company's Line Extension Policy in areas otherwise qualifying for street lighting on one of the following conditions and at the discretion of the Company:

a) With respect to established and substantially fully developed areas, Shared Lighting Service will be provided upon receipt by the Company of a petition or other written request from a majority of the electric members located within such an area.

b) With respect to areas currently being subdivided and developed, Shared Lighting Service will be provided upon receipt of a petition or other written request for service in the form satisfactory to the Company obtained by the builder or developer signed by each electric member within such subdivision.

c) Where the area proposed to be served is subject to the terms and provisions of an unconditional restrictive covenant which provides in substance that present and subsequent owners of property in the area proposed to be served are subject to and bound by present and future United Power, Inc. tariffs.

.

4. Street lighting systems will be designed and installed by the Company in accordance with good engineering practices and under the terms and conditions of the Company's Line Extension Policy.

5. The Monthly Rate for Shared Lighting Service provided hereunder includes all maintenance and replacement for street lighting facilities owned and maintained by Company. Member will not be billed separately for maintenance charges.

6. Member shall notify Company of any Company-owned street lighting unit that is damaged or inoperable.

Effective June 19, 1981, no additional mercury vapor lighting systems or mixed ownership systems shall be installed by United. However, service under this schedule shall continue to be available to existing, mercury vapor units until further notice.

ELECTRIC RATES

NET METERING SERVICE ~~Rate~~
(Schedule NM)

Availability

Available within all territory served by United Power.

Net metering s~~S~~ervice is available to all ~~m~~Member-Generators~~consumers~~. ~~All service shall be provided at the appropriate residential, commercial, or industrial rate.~~

Applicability

Applicable to Member-Generators ~~Consumers who~~that own or operate an eligible Net Metering S~~s~~ystem, as defined in the definitions. Net Metering service shall require execution of an ~~written~~ Interconnection Agreement between the Member-Generator~~Consumer~~ and United Power.

Net Metering service is available to all Member-Generators~~members~~, provided that the Net Metering System's rated capacity does not exceed the premises service entrance capacity which normally serves all or a portion of the Member-Generator~~member~~'s electrical load requirements that can be supplied from any device producing electrical energy and does not exceed 200% of annual energy usage either calculated or actual. If the ~~Retail Distributed Generation Resource or Retail Distributed Non-Generation Resource~~ Net Metering System's ~~facility(s)~~ capacity exceeds these limits, United Power reserves the right not to provide Net Metering service to the Member-Generator~~Consumer~~ to the extent permitted by law.

~~The Retail Distributed Generation Resource or Retail Distributed Non-Generation Resource facility(s) must be located on premises that are owned or controlled by the Member-Consumer. The system must be intended to offset part or all of the member-consumer's electrical requirements for electrical energy at the same location, and may not be used to offset electric consumption at another location.~~ To the fullest extent permitted by law, United Power, ~~at~~ in its sole discretion, reserves the right to refuse service under this schedule to Member-Generators that ~~may~~ have limited load, are ~~in the sole opinion of the cooperative~~ primarily generators, that do not satisfy the requirements of this schedule or the Interconnection Tariff, or ~~without any cause~~as permitted by applicable law.

Definitions

Interconnection Agreement
A written agreement between United Power and the Member-Generator that establishes the terms and conditions governing the interconnection and parallel operation of the Member-Generator's Net Metering System with United Power's distribution system.

Interconnection Tariff
United Power's tariff governing interconnection service for Distributed Energy Resources interconnected with, or seeking to interconnect with, United Power's distribution system, as amended from time to time. For purposes of this schedule, references to the Interconnection Tariff include the Interconnection Procedures and all other requirements, standards, criteria, and other documents incorporated or referenced therein.

Member-~~Consumer~~Generator

A United Power Mmember ~~who~~ that ~~is also the~~ ownser ~~or~~ operatesor ~~of~~ a Net Metering Ssystem.

Net Metering
Measuring of the difference between the electricity supplied to a Member-GeneratorConsumer by or through United Power's distribution system and the electricity generated by the Member-GeneratorConsumer and delivered to United Power at the same point of interconnection.

Net Metering System
A system used by a Member-Generator for the ~~Retail Distributed Generation Resource or Retail Distributed Non-Generation Resource and~~ Net Metering of electricity meeting each of the following requirements:

~~1. The Retail Distributed Generation Resource system uses as its energy source, solar, wind, biomass, diesel, natural gas or hydropower resources;~~
~~2. The Retail Distributed Non-Generation Resource system is an Energy Storage System, such as batteries or other future technologies, that are commercially available technology that is capable of retaining, storing the energy for a period of time, and delivering the energy after storage by Chemical, Thermal, Mechanical, or other means;~~1. The system generates electricity on the Member-Generator's side of the meter using eligible energy resources, as defined in Colorado Revised Statute 40-2-124 as amended, including renewable energy resources and renewable energy storage;

2~~3~~. The system is located on ~~the~~ premises that are owned, operated, leased, or otherwise controlled by the Member-GeneratorConsumer within United Power's service territory;

3. The Member-Generator has executed an Interconnection Agreement with United Power and satisfied all conditions precedent to interconnection and parallel operation under the Interconnection Tariff;

4. The system is interconnected and operates in parallel with United Power's distribution system in accordance with the Interconnection Agreement and the Interconnection Tariff;

5. The system is intended primarily to offset part, or all, ~~or~~ of the Member-Generator's~~Consumer's~~ requirements for electric energy at the same location;

6. The system ~~shall~~ is not ~~be~~ used to offset or provide credits for electric consumption at another location of the Member-Generator ~~member~~ or for any other Mmember;~~.~~

7. The system satisfies all applicable capacity limits under this schedule.

Type of Service Available
Single-phase and three-phase, 60 cycles, at available distribution voltages; provided that single-phase service shall not be available where the total load exceeds one hundred (100) kW.

Monthly Rate
~~All power and energy delivered to the Member-Consumer shall be billed at United Power's applicable rate tariff(s). Additionally, a Fixed, Backup, or Standby fee may be included in the Net Metering~~

~~Agreement to offset costs incurred by United Power.~~The provision of net metering service under this schedule is separate from the provision of electric service or any other services. Electric service and any other services provided by United Power to the Member-Generator shall be furnished and billed under the applicable rate tariff(s). Nothing in this schedule limits United Power's right to assess any charges, fees, or costs authorized by the applicable rate tariff(s), or otherwise applicable.

United Power shall provide a credit to the Member-Generator~~Consumer~~ for energy delivered to United Power equal to United Power's avoided cost. The avoided cost shall be United Power's average wholesale cost of energy, excluding special contract rates, for the immediately preceding calendar year. If the Member-Generator~~Consumer~~'s net aggregate bill is less than zero, credits shall be carried over to future bill of the Member-Generator~~Consumer~~ until the credit balance is zero. At the end of March revenue month each year, any remaining unused credit balance that has been accumulated during the previous twelve (12) months shall be paid to the Member-Generator~~Consumer~~.

Service Conditions

The Member-Generator~~Consumer interconnection requirements~~ shall comply with this schedule, the ~~current United Power~~ Interconnection Tariff, the Interconnection Agreement, and applicable law as a condition of receiving and continuing to receive net metering service~~Interconnection Procedures for Distributive Energy Resources facilities as applicable. These Procedures are subject to periodic revision. The most current terms of the United Power's Interconnection Procedures will be the one applicable~~.

Metering

United Power will provide, install, own, operate, and maintain all meter(s) and metering equipment necessary to measure both the electric power and energy supplied by United Power and the energy delivered by the Member-Generator~~Consumer~~. United Power reserves the right to utilize measurement(s) from its meter on the energy delivered by the Member-Generator~~Consumer~~'s Net Metering S~~s~~ystem for billing the unit's net production. United Power also reserves the right, as may be specified in the ~~written~~ Interconnection A~~a~~greement, to charge the Member-Generator~~Consumer~~ for any additional metering or meter reading expense, or a backup, or standby fee, incurred in conjunction with a Net Metering S~~s~~ystem.

The Member-~~Consumer~~ Generator shall be responsible for all costs associated with the Net Metering system. ~~as well as any costs related to modifications to the Net Metering~~

~~system that may be required by United Power for purposes of interconnectivity, safety, and/or reliability. The Member-Consumer shall comply with the most current United Power Interconnection Procedures for Distributive Energy Resources facilities as applicable. These Procedures are subject to periodic revision.~~

Service Period

As specified in ~~written Net Metering~~the Interconnection Agreement between the Member-Generator~~Consumer~~ and United Power.

~~**Safety and Quality of Service**~~

~~The Member-Consumer shall pay all costs incurred by United Power for equipment or services necessary to meet the safety and performance standards and other interconnection requirements, and shall comply with most current United Power~~

~~Interconnection Procedures for Distributive Energy Resource facilities as applicable. These Procedures are subject to periodic revision.~~

~~**Agreement**~~

~~An Agreement for electric service specifying interconnection, metering, specific charges, and terms shall be required before Net Metering service is provided.~~

Rules and Regulations

~~1. Unauthorized interconnections to United Power's distribution grid include and are not limited to: equipment that has not passed an electrical inspection, has not received approval from a certified inspector, equipment that does not comply with applicable state regulations or compliance with United Power's Interconnection for Distributive Energy Resources procedures, energy systems presently installed or operating without written approval from United Power, or if an interconnection agreement has not been signed by the member and approved by United Power, including application fee. United Power reserves the right to either disconnect the system or charge member a monthly non-refundable fee until such time that all requirements have been satisfied.~~

~~2. United Power reserves the right to disconnect distributive energy resources at any time for safety reasons, or in order to restore quality of service to other members, e.g. for steady state/transient voltage, reliability, harmonics, or other problems that are suspected to be the result of defective Net Metering system equipment.3. A Net Metering system shall meet all applicable standards and guidelines for safety and performance as established by the National Electric Code, the Institute of Electrical and Electronics Engineers, the National Electric Safety Code, Underwriters Laboratories, Inc., and any other applicable regulations and standards.~~

~~4. The Member-Consumer shall provide, at its expense, a lockable switch capable of visibly isolating the net metering system from United Power's distribution system and a complete interconnection protection system. All Net Metering equipment shall be approved by United Power prior to installation, and shall be accessible to United Power at all times.~~

~~5. Electric~~ Net metering service supplied under this schedule shall be subject to the terms and conditions set forth in the most current United Power's policies, tariffs, and other rules and regulations set forth in the Interconnection Tariff and the Interconnection Agreement between United Power and the Member-Generator. ~~The Service Installation Guide.~~

~~**Liability and Indemnification**~~

~~United Power shall not be liable, directly or indirectly, for permitting or continuing to allow an attachment of a Net Metering system, or for acts or omissions of the Member-Consumer that cause loss or injury, including death, to the Member-Consumer or any third party. The Member-Consumer shall indemnify the electric utility for any and all damage to persons or property and any and all damages or losses incurred by third parties or their heirs, successors, or assigns or such third parties, as the result of the installation or operation of the Net Metering system.~~

INTERCONNECTION TARIFF

INTERCONNECTION SERVICE FOR DISTRIBUTED ENERGY RESROURCES (DER)

General
This schedule establishes United Power's fees, deadlines, and procedures for interconnection service, as required by Section 3853(p) of the CPUC Interconnection Rules.

Availability
Available within all territory served by United Power. Interconnection service is available to Member-Interconnectors (M-Is) who own or operate a Distributed Energy Resource (DER) with a rated capacity of 10 MW AC or less.

Applicability
Applicable to M-Is seeking to interconnect and operate a DER in parallel with United Power's Distribution System.

Definitions
Capitalized terms which are not otherwise defined in this schedule shall have the meanings set forth in CPUC Interconnection Rules.

Application
The interconnection application submitted by an M-I requesting to interconnect a new DER, or to increase the capacity of, or make a material modification to the operating characteristics of, an existing DER that is interconnected with United Power's Distribution System.

CPUC Interconnection Rules
The Colorado Public Utilities Commission's Interconnection Procedures and Standards (4 CCR 723-3 §§ 3550-3859).

Distributed Energy Resource (DER)
The M-I's source of electric power interconnecting to, or seeking to interconnect to, United Power's Distribution System, including retail renewable distributed generation, other small generation facilities for the production of electricity, Energy Storage Systems, or combination of any of these elements, as identified in the Application, but shall not include the Interconnection Facilities not owned by the M-I.

Interconnection Agreement
A written agreement between United Power and the M-I that establishes the terms and conditions governing the interconnection and parallel operation of the M-I's DER with the United Power Distribution System.

Interconnection Costs
All costs, expenses, and fees associated with a DER and its interconnection to the United Power Distribution System, including, but not limited to, interconnection service fees, and costs associated with metering equipment, Interconnection Facilities, Distribution System upgrades and modifications, protective equipment, design review, inspection, commissioning and witness testing, and the purchase, installation, operation, maintenance, testing, repair, replacement, and modification of facilities or equipment required for interconnection.

Interconnection Procedures
United Power's Interconnection Procedures for Distributed Energy Resources, as may be amended from time to time, together with all technical requirements, standards, codes, guidelines, criteria, and other documents referenced or incorporated therein relating to safety, reliability, and power quality.

Member-Interconnector (M-I)
A United Power member that owns or operates a DER interconnected with, or seeking to interconnect with, the United Power Distribution System.

Mainline
The three-phase backbone of a circuit.

Witness Test
United Power's observation and inspection of a DER during commissioning tests conducted to verify compliance with applicable technical, safety, reliability, and power quality requirements.

Monthly Rate
The provision of interconnection service under this schedule is separate from the provision of electric service. Electric service and any other services provided by United Power to the M-I shall be furnished and billed under the applicable rate tariff(s). Nothing in this schedule limits United Power's right to assess any charges, fees, or costs authorized by the applicable rate tariff(s), or otherwise applicable.

Cost-Based Interconnection Service Fees
Pre-Application Report Request Fee: $500
Level 1 Application Fee: $300
Level 2 Application Fee: $500
Level 3 Application Fee: $1,000

The M-I shall pay the applicable Application fee upon submitting its Application. All interconnection service fees are non-refundable. If an Application transitions to a higher level of review, the M-I shall pay the difference in fees before proceeding under the higher level of review.

Unless otherwise provided in the Interconnection Agreement, the M-I is responsible for all Interconnection Costs.

Service Conditions
An M-I may not interconnect or operate a DER in parallel with United Power's Distribution System unless:
1. The M-I has submitted a valid and complete Application;
2. The M-I has executed an Interconnection Agreement with United Power;
3. The M-I demonstrates to United Power's satisfaction that the DER satisfies all required technical, safety, reliability, and power quality requirements;
4. The M-I has obtained all required permits, inspections, and approvals and furnished satisfactory evidence thereof to United Power;
5. The M-I has paid all outstanding Interconnection Costs to United Power; and

6. United Power has approved interconnection of the DER and provided written authorization for parallel operation in accordance with the Interconnection Agreement and Interconnection Procedures.

As a condition of continued interconnection service, the M-I shall remain in compliance with this schedule, the Interconnection Procedures, the Interconnection Agreement, and all applicable laws.

Any interconnection established or operated in violation of this schedule constitutes an unauthorized interconnection. United Power may immediately disconnect an unauthorized interconnection. The M-I shall be responsible for all costs, expenses, and fees incurred by United Power in connection with an unauthorized interconnection, and United Power may discontinue service to, and withhold additional services from, the M-I until such amounts have been paid in full.

Metering

United Power will furnish, install, own, and maintain all metering equipment needed to meter the electric service provided to the M-I and the electrical output of the DER, including any additional metering equipment required to obtain the necessary quality of billing data. All costs associated with such metering equipment constitute Interconnection Costs.

United Power will follow the applicable meter collar adapter and production meter requirements to the extent required by law.

Portable-scale Solar Generation Devices

Portable-scale solar generation devices, as defined in C.R.S. § 40-2-140, are subject to applicable law and exempt from conflicting provisions of this schedule to the extent required by law. Before installing or using such a device, the Member-Interconnector shall notify United Power of its rated capacity in kilowatts.

Service Period

As specified in the Interconnection Agreement. M-Is seeking to reinstate interconnection service must submit a new Application and comply with all applicable interconnection requirements.

Interconnection Procedures

United Power will process Applications in accordance with the Interconnection Procedures and the CPUC Interconnection Rules. United Power will make the Interconnection Procedures, Application forms, and interconnection-related contact information available on its website.

Applications will be processed under one of following review levels:

1. Level 1 Process (Certified inverter-based systems up to 25 kW)
2. Level 2 Process (Fast Track)
3. Level 3 Process (Feasibility, System Impact, and Facilities Studies)

United Power will determine eligibility for each review level in accordance with the CPUC Interconnection Rules and the Interconnection Procedures.

Timelines and Procedures Required by Section 3853(p) of the CPUC Interconnection Rules

United Power will process Applications in accordance with the timelines established by the CPUC Interconnection Rules, including the following:

1. Informal pre-application request: United Power will respond within 15 Business Days after receiving the M-I's request.
2. Formal pre-application request: United Power will provide a pre-application report within 20 Business Days after receiving a completed request form and fee payment.
3. Application Acknowledgement: United Power will acknowledge receipt of an Application within three Business Days after receiving the Application and fee payment.
4. Completeness review: United Power will determine whether the Application is complete and verify the applicable review level within 10 Business Days after receiving the Application and fee payment. The M-I shall submit missing information or request an extension within 10 Business Days after receiving a notice of incompleteness.
5. United Power will determine the maximum rated capacity of a DER in accordance with Sections 3853(b) of the CPUC Interconnection Rules, except as provided otherwise in Section 3853(c) for Energy Storage Systems.
6. Material modification determination: The M-I shall promptly inform United Power of any change to the information in the Application. United Power will determine whether a change constitutes a material modification within 10 Business Days after receiving sufficient information to evaluate the change. The M-I shall withdraw the change or submit a new Application within 10 Business Days after receiving a material modification determination.
7. Interconnection Agreement Execution: Except as otherwise allowed by the CPUC Interconnection Rules, the M-I shall execute and return an Interconnection Agreement, without changes, within 30 Business Days after receiving the Interconnection Agreement from United Power. United Power will provide a fully executed Interconnection Agreement within 2 Business Days after receiving the signed Interconnection Agreement.
8. <u>Level 1</u>
    a. Review: United Power will perform the Level 1 review within 10 Business Days after sending a notification of completeness.
    b. Approval/denial: If the DER satisfies the Level 1 screening requirements, United Power will approve the Application within 10 Business Days after completing the review. If the DER does not qualify for approval under the Level 1 Process, United Power will continue under the Level 2 Process upon payment of the Level 2 fees, except if the DER otherwise qualifies for interconnection, United Power will provide an executable Interconnection Agreement within five Business Days after completing the review.
9. <u>Level 2</u>
    a. Review: United Power will perform the Level 2 initial review within 15 Business Days after sending a notification of completeness.
    b. Approval/denial: If the Application cannot be approved as submitted, United Power will provide notice within five Business Days after making such determination, along with supporting data and analysis, and will offer a customer options meeting within 10 Business Days after such determination.
    c. Supplemental Review: If United Power offers supplemental review, the M-I shall accept in writing and pay the required deposit within 15 Business Days. United Power will perform supplemental review and provide the results, along with supporting data and analysis, within 30 Business Days after M-I satisfies all conditions precedent.
10. <u>Level 3</u>
    a. Scoping Meeting: United Power will hold a scoping meeting within 10 Business Days after sending a notification of completeness, unless the parties agree otherwise.
    b. Feasibility Study: United Power will provide a Feasibility Study Agreement within five Business

Days after the scoping meeting, if required. The M-I shall sign and return the Feasibility Study Agreement and pay the required deposit within 15 Business Days after receipt. United Power will perform the Feasibility Study within 30 Business Days after M-I satisfies all conditions precedent.

c. System Impact Study: United Power will provide a System Impact Study Agreement within five Business Days after the scoping meeting if a Feasibility Study is waived, or 15 Business Days after issuing the Feasibility Study report, if applicable. The M-I shall sign and return the System Impact Study Agreement and pay the required deposit within 30 Business Days after receipt. United Power will perform the System Impact Study within 30 Business Days after M-I satisfies all conditions precedent.
d. Facilities Study: If performing a Facilities Study, United Power will provide a Facilities Study Agreement, and the M-I shall sign and return the Facilities Study Agreement, or request an extension, within 30 Business Days after receipt. United Power will perform the Facilities Study within 45 Business Days after M-I satisfies all conditions precedent.
e. Combined Studies: United Power will complete any combined studies within 90 Business Days after the M-I authorizes United Power to proceed with the Level 3 Process and satisfies all conditions precedent.
f. Interconnection Agreement: United Power will provide an Interconnection Agreement within five Business Days after completing the final required study.
g. Waiver: If the parties waive all studies, United Power will provide an Interconnection Agreement withing 10 Business Days after the scoping meeting, or within 10 Business Days after the notification of completeness if the parties also waive the scoping meeting.

Rules and Regulations

Interconnection service supplied under this schedule shall be subject to the terms and conditions set forth in the most current United Power's policies, tariffs, and other requirements set forth in the Interconnection Procedures, and the Interconnection Agreement between United Power and the M-I.
