

# REBATES

## FOR ENERGY EFFICIENCY

2021

### REBATE REQUIREMENTS

United Power members qualify for these Energy Efficiency Rebates. Members are encouraged to call United Power prior to purchasing and installing any new equipment to be assured of meeting all rebate requirements. United Power and Tri-State Generation & Transmission rebates are both issued by United Power.

**Heat Pump, ENERGY STAR® Air Conditioner, Electric Water Heater and Electric Heat** rebates must be requested within **120 days** of installation, require an on-site inspection by United Power's Energy Management Team, and a rebate application completed by United Power. An invoice detailing equipment brand, model number, and itemized pricing for equipment and labor costs to help determine rebate amount, is required to issue rebates in this category.

**ENERGY STAR® Appliance** rebates must be requested within **120 days** of purchase. Rebates are issued as a bill credit and may take up to two billing cycles to appear. Applications are completed by the member and must be submitted with proof of purchase. Submission of an application does not guarantee a rebate. United Power reserves the right to inspect installation. Applications can be found at [www.unitedpower.com](http://www.unitedpower.com).

**Refrigerator/Freezer Recycling Credits** are limited to two (2) per membership, per year. Requests must be submitted with proof that the unit was properly recycled by an appliance retailer or appliance recycler.
